

## Aluminum Universal System

⊙ Design *X-line*

We created a brand new innovative universal system for railings the *X-line*.

This system is based on the traditional system.

Its innovation consists on the fixing of traditional accessories on the vertical KIT, which is realized with a sliding accessory that we can position it, based on Standard System.

Fixation is done with friction between sliding accessory and the vertical profile.

The cost and difficulty of installation are reduced compared to the traditional systems.

The system is patented and certified in Europe ,Balkan and Africa from WIPO.

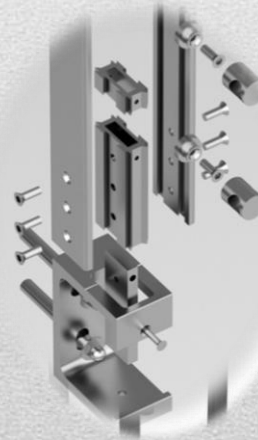

**THAT MAKES THIS SYSTEM:**  
➤ MULTIFUNCTIONAL  
➤ UNIVERSAL  
➤ UNIQUE
